

## STREP A RAPID TEST

# STREP A

*Easy to use professional Rapid Strep A test for the qualitative detection of Strep A antigen in throat swab specimens.*

- Reliable results in 5 minutes
- Direct detection of bacterial antigen not dependent on bacterial growth in culture
- Complete test pack with swabs, reagents and working station
- Accurate in clinical trials with comparable leading brands
- Allows correct administration of antibiotics
- Long shelf life at room temperature storage
- Built in procedural control

The NCS Strep A Rapid Test Device is a rapid test to qualitatively detect the presence of Strep A antigen in throat swab specimens, providing results within 5 minutes. The test utilizes antibodies specific for whole cell Lancefield Group A Streptococcus to selectively detect Strep A antigen in a throat swab specimen.

## RAPID TEST FOR *P. FALCIPARUM* MALARIA + PAN/PF

PAN/PF

- Finger prick/EDTA whole blood
- 2 step procedure
- Results in 15 minutes
- Easy to read
- Individually packaged
- No special equipment required
- Long shelf life at room temperature storage

Four species of the Plasmodium parasites are responsible for malaria infections in human viz. *P. falciparum*, *P. vivax*, *P. ovale* and *P. malariae*. Of these *P. falciparum* and *P. vivax* are the most prevalent. Early detection and differentiation of malaria is of paramount importance due to incidence of cerebral malaria and drug resistance associated with *P. falciparum* malaria and due to the morbidity associated with the other malaria forms.

## MONONUCLEOSIS RAPID TEST

IM

*A rapid test for the qualitative detection of Infectious Mononucleosis (IM) heterophile in whole blood, serum, and plasma.*

- Clear results in 5 minutes
- External controls included with each kit
- Serum/plasma or blood
- Effective patient management in a single visit
- Improved quality of patient care
- Accurate in clinical trials with comparable leading brands
- Long shelf life at room temperature storage
- Built in procedural control line

The Mononucleosis Rapid Test Device is a simple test that utilizes an extract of bovine erythrocytes to qualitatively and selectively detect IM heterophile antibodies in whole blood, serum or plasma in just minutes.
